

Letter of Recommendation

Dear Apple Developer Academy Team,

This letter is submitted in support of Owen Putra Halim's application to the Apple Developer Academy. Based on his initiative, adaptability, and consistent involvement in activities beyond regular coursework, I believe he is a strong candidate for this opportunity.

I am Ivan Sebastian Edbert, Head of the Artificial Intelligence Program at BINUS University. In this capacity, I have had the opportunity to observe students' academic growth, initiative, and involvement within the program. From what I have seen, Owen is able to adapt quickly to university life and has shown a consistent willingness to grow beyond regular coursework.

During his second year of study, Owen became actively involved in competitions and project-based activities. His participation reflected not only interest, but also determination and consistency. I observed that he continued to seek opportunities to improve, learn from experience, and engage with practical problems that required both technical understanding and personal discipline.

One example of this was his effort to obtain access to relevant datasets for his work, where I served as an academic reference for his credentials. This showed me that Owen was willing to take the necessary steps to support his learning and move his projects forward responsibly.

Based on these observations, I believe Owen has the attitude, adaptability, and persistence needed to benefit from the Apple Developer Academy. I respectfully recommend him for this opportunity and believe that he would be able to contribute positively while continuing to develop his potential in a practical and collaborative learning environment.

I would be pleased to remain available should the Committee require any further information that may assist in the consideration of Owen's application.

Sincerely,

Ivan Sebastian Edbert
Head of Artificial Intelligence Program
BINUS University
