

Letter of Recommendation

Dear Apple Developer Academy Team,

It is with sincere respect that I submit this letter of recommendation for Owen Putra Halim, whom I believe would be a suitable and promising candidate for the Apple Developer Academy.

I am Gabriel Asael, an Associate Lecturer Specialist in Artificial Intelligence at BINUS University. I have been entrusted to teach courses related to the application of Artificial Intelligence in real-world contexts, including MLOps and AI Solution. In addition, I have also been entrusted to teach learners from Bank BCA on topics related to practical AI implementation and the responsible use of AI in professional settings.

My academic interaction with Owen began during his third semester, around the time he started becoming actively involved in competitions and project-based activities. Throughout this period, he showed a clear willingness to take on challenges beyond regular coursework. He demonstrated persistence in preparing for competitions and consistently made an effort to understand the cases, requirements, and problems he was working on.

One quality I appreciate from Owen is that he does not only focus on the technical side of a solution. He also tries to understand the context of the problem and consider whether the proposed solution is relevant and applicable. This reflects his practical mindset and his ability to approach problems with broader consideration.

By the end of his fourth semester, I saw noticeable development in Owen's abilities. His growth was not only reflected in his technical skills, but also in his ability to analyze cases, organize ideas, and communicate his work more clearly. I also observed improvement in his confidence, presentation skills, and overall readiness to explain his solutions in a structured way.

Based on my experience teaching and observing Owen, I believe the Apple Developer Academy would be a suitable environment for him to continue growing. He has the curiosity, persistence, adaptability, and practical mindset needed to benefit from a project-based learning environment and contribute meaningfully to the program.

Should any further information be required, I would be pleased to provide it upon request.

Sincerely,

Gabriel Asael
